A Short Proof of a Generalised Conjecture of Erdős in Amenable Groups

Kai Prince

1 Abstract

2 Introduction

3 Preliminaries

3.1 Amenable Groups and Actions

3.2 Topological Dynamics of Group Actions

3.3 Recurrence Results & Ergodic Theorems

3.4 Erdős Cubes & Cubic Measures

3.5 Factor Maps

3.6 Key Dynamical Results

4 Proof of Theorem (ref)

4.1 Furstenberg's Correspondence Princple

4.2 Kronecker Factor

4.3 Choosing a point x_1

4.4 The joining ν

4.5 Proof Conclusion

5 Proof of Corollary (ref)

6 Proof of Theorem (ref)

7 Discussion
