**Abstract**

**Introduction**

**Preliminaries**

**Amenable Groups and Actions**

**Topological Dynamics of Group Actions**

**Recurrence Results & Ergodic Theorems**

**Erdős Cubes & Cubic Measures**

**Factor Maps**

**Key Dynamical Results**

**Proof of Theorem (ref)**

**Furstenberg's Correspondence Principle**

**Kronecker Factor**

**Choosing a point  $x_1$**

**The joining  $\nu$**

**Proof Conclusion**

**Proof of Corollary (ref)**

**Proof of Theorem (ref)**

**Discussion**
